# SUBJECT INDEX: VOLUME 61

## Acetylcholine

Supersensitivity of coronary arteries in variant angina to spasm induced by intracoronary acetylcholine, 77

## Acute myocardial infarction

See also Myocardial infarction

Coronary artery spasm, cardiac arrest, transient electrocardiographic Q waves and stunned myocardium in cocaine-associated acute myocardial infarction, 939

Efficacy of intravenous prourokinase and a combination of prourokinase and urokinase in acute myocardial infarction, 971

Idioventricular rates in early and late phases of acute myocardial infarction, 936

Low dose aspirin after early thrombolysis in anterior wall acute myocardial infarction, 904

Prognostic significance of angina pectoris before first acute myocardial infarction, 984

Prognostic significance of ventricular ectopic activity in survivors of acute myocardial infarction who receive propranolol, 975

Psychosocial and physiological predictors of sudden cardiac death after healing of acute myocardial infarction, 979

Recombinant single-chain urokinase-type plasminogen activator during acute myocardial infarction, 966

Relation of coronary arterial patency and left ventricular function to electrocardiographic changes after streptokinase treatment during acute myocardial infarction, 961

Relation of left ventricular free wall rupture in acute myocardial infarction to forced immobilization, 910

## Adenosine

Usefulness of adenosine for arrhythmias in infants and children, 336

## Adenosine triphosphate

Comparative quantitative electrophysiologic effects of adenosine triphosphate on the sinus node and atrioventricular node, 330

## AJC 25 Years Ago

The AJC in April 1963, 938  
The AJC in February 1963, 495  
The AJC in January 1963, 199  
The AJC in June 1963, 1362  
The AJC in March 1963, 671  
The AJC in May 1963, 1149

## Alcohol

Hemodynamic effects of alcohol at rest and during upright exercise in coronary artery disease, 61

## Allograft

Associations of HLA-A, B, DR antigens with primary disease in cardiac allograft recipients, 1359

## Ambulatory monitoring

See also Holter monitoring

Arterial distensibility and ambulatory blood pressure monitoring in essential hypertension, 1063

Asymptomatic myocardial ischemia as a predictor of cardiac events after coronary artery bypass grafting for

stable angina pectoris, 248

Left ventricular performance determined by ambulatory monitoring of systolic time intervals during daily activities in the late hospital phase of acute myocardial infarction, 1347

## Amlodarone

Prospective evaluation of a discriminant function for prediction of recurrent symptomatic ventricular tachycardia or ventricular fibrillation in coronary artery disease patients receiving amlodarone and having inducible ventricular tachycardia at electrophysiologic study, 1024

Use dependence of amlodarone during the sinus tachycardia of exercise in coronary artery disease, 1042

## Anastomosis

Rupture of an aneurysmal pulmonary trunk 40 years after Blalock-Taussig anastomosis, 477

## Aneurysm

Atherosclerotic aneurysms of aortocoronary vein grafts, 185

Evolution of the responses to exercise in left ventricular aneurysms after anterior wall acute myocardial infarction, 236

## Angina pectoris

Acute effects of felodipine in exertional angina pectoris, 691

Angina pectoris and coronary artery disease in severe aortic regurgitation, 826

Angiographic demonstration of a common link between unstable angina pectoris and non-Q wave acute myocardial infarction, 244

Asymptomatic myocardial ischemia as a predictor of cardiac events after coronary artery bypass grafting for stable angina pectoris, 248

Characteristics of silent and symptomatic myocardial ischemia during daily activities, 1223

Comparison of bevantolol and atenolol in chronic stable angina, 1204

Comparison of effects of medical and surgical therapy on survival in severe angina pectoris and two-vessel coronary artery disease with and without left ventricular dysfunction: A Coronary Artery Surgery Study registry study, 1198

Effects of phenolamine and atropine on angina pectoris induced by handgrip test in patients with variant angina, 71

Factors of importance for prognosis in men with angina pectoris derived from a random population sample. The Multifactor Primary Prevention Trial, Gothenburg, Sweden, 530

Frequency of ST-segment depression produced by mental stress in stable angina pectoris from coronary artery disease, 989

Functional characteristics of nonischemic region during pacing-induced myocardial ischemia in angina pectoris, 1214

Lack of diurnal variation in maximal symptom-limited exercise test response in chronic stable angina, 38

Long-term bepridil monotherapy for angina pectoris, 1210

Percutaneous transluminal coronary angioplasty for angina pectoris after a non-Q-wave acute myocardial infarction, 240

Prognostic significance of angina pectoris before first acute myocardial infarction, 984

Reduction of nitroglycerin and isosorbide dinitrate by hemodialysis in refractory angina pectoris after acute myocardial infarction, 954

Results of percutaneous transluminal coronary angioplasty for angina pectoris early after acute myocardial infarction, 1238

Results of percutaneous transluminal coronary angioplasty for unstable angina pectoris in patients 70 years of age and older, 994

Sustained antianginal efficacy of transdermal nitroglycerin patches using an overnight 10-hour nitrate-free interval, 46

Transient myocardial ischemia after abrupt withdrawal of antianginal therapy in chronic stable angina, 1219

Usefulness of serial radionuclide monitoring during graded nitroglycerin infusion for unstable angina pectoris for determining left ventricular function and individualized therapeutic dose, 685

## Angiography

Angiographic demonstration of a common link between unstable angina pectoris and non-Q wave acute myocardial infarction, 244

Angiographic demonstration of spasm in a left internal mammary artery used as a bypass to the left anterior descending coronary artery, 1363

Assessment of left ventricular volume changes during exercise radionuclide angiography in coronary artery disease, 912

Asymptomatic form of left pulmonary artery sling, 177

Clinical and angiographic correlates and prognostic significance of the coronary extent score, 1255

Comparison of magnetic resonance imaging with echocardiography and radionuclide angiography in assessing cardiac function and anatomy following Mustard's operation for transposition of the great arteries, 1316

Comparison of pulsed Doppler echocardiography and radionuclide angiography in the assessment of left ventricular filling, 446

Coronary vasodilatory action after a single dose of nicorandil, 292

Correlation of left ventricular angiographic casts and biplane left ventricular volumetry in infants and children, 441

Effect of hospitalization on high density lipoprotein cholesterol in patients undergoing elective coronary angiography, 998

Methergin® testing with angiographically normal coronary arteries, 295

"Microvascular angina" as a cause of

- chest pain with angiographically normal coronary arteries, 1336
- Primary coronary artery dissection observed at coronary angiography, 645
- Angioplasty**
- Early and late assessment of stenosis geometry after coronary arterial stenting, 548
- Angioplasty, percutaneous transluminal coronary**

- Enhanced efficacy of oral sotalol for sustained ventricular tachycardia refractory to type I antiarrhythmic drugs, 1012
- Immediate quantitation of antiarrhythmic drug effect by monophasic action potential recording in coronary artery disease, 1284
- Noninvasive evaluation of idocaine for serious ventricular tachyarrhythmia, 784
- Relation of acute antiarrhythmic drug efficacy to left ventricular function in coronary artery disease, 1050
- Aortic aneurysm**
- Aortic aneurysms after subclavian angioplasty repair of coarctation of the aorta, 951
- Isolated descending thoracic aortic aneurysm in Marfan's syndrome, 1159
- Aortic arch**
- Double aortic arch with bilateral coarctations, 196
- Aortic balloon valvuloplasty**
- Changes in coronary blood flow and myocardial metabolism during aortic balloon valvuloplasty, 1080
- Aortic coarctation**
- Coarctation of the aorta, bicuspid aortic valve and abnormal ascending aortic wall, 182
- Early results of balloon angioplasty of native aortic coarctation in young adults, 930
- Aortic ejection sound**
- Prevalence and characteristics of the aortic ejection sound in adults, 142
- Aortic regurgitation**
- See also Aortic valve
- Angina pectoris and coronary artery disease in severe aortic regurgitation, 826
- Color and pulsed-wave Doppler study of aortic regurgitation in systemic hypertension, 928
- Determinants of anterior mitral leaflet fluttering in pure aortic regurgitation from a pulsed Doppler study of the early diastolic interaction between the regurgitant jet and mitral inflow, 1085
- Pivotal role of aortic valve area calculation by the continuity equation for Doppler assessment of aortic stenosis in patients with combined aortic stenosis and regurgitation, 376
- The sign of the flashing wheel in aortic regurgitation, 1158
- Aortic stenosis**
- See also Stenosis
- A new and simple method to measure maximal aortic valve pressure gradients by Doppler echocardiography, 382
- Comparison of outcome of asymptomatic to symptomatic patients older than 20 years of age with valvular aortic stenosis, 123
- Dual balloon technique for valvuloplasty of aortic stenosis in adults, 583
- Pivotal role of aortic valve area calculation by the continuity equation for Doppler assessment of aortic stenosis in patients with combined aortic stenosis and regurgitation, 376
- Usefulness of noninvasive assessment of aortic stenosis before and after percutaneous aortic valvuloplasty, 1300
- Aortic valve**
- See also Aortic regurgitation
- A new and simple method to measure maximal aortic valve pressure gradients by Doppler echocardiography, 382
- Coronary ostial stenosis after aortic valve replacement without coronary cannulation, 1156
- Pivotal role of aortic valve area calculation by the continuity equation for Doppler assessment of aortic stenosis in patients with combined aortic stenosis and regurgitation, 376
- Arrhythmia**
- See also Antiarrhythmic therapy; Ventricular arrhythmia
- Endocardial catheter fulguration for treatment of atrial flutter, 471
- Inducible atrial flutter after the Mustard repair of complete transposition of the great arteries, 428
- Limited value of programmed electrical stimulation from multiple right ventricular pacing sites in clinically sustained ventricular fibrillation or ventricular tachycardia associated with coronary artery disease, 303
- Mechanism of death and prevalence of myocardial ischemic symptoms in the terminal event after acute myocardial infarction, 8
- Prognostic significance of arrhythmia inducibility or noninducibility at initial electrophysiologic study in survivors of cardiac arrest, 578
- Usefulness of adenosine for arrhythmias in infants and children, 336
- Value of the signal-averaged electrocardiogram as a predictor of the results of programmed stimulation in nonsustained ventricular tachycardia, 1272
- Arrhythmogenesis**
- Arrhythmogenesis of antiarrhythmic drugs, 1108
- Arteriography**
- Correlation of coronary arteriography after acute myocardial infarction with predischARGE limited exercise test response, 201
- Aspirin**
- Effects of current therapy of Kawasaki disease on eicosanoid metabolism, 1323
- Low dose aspirin after early thrombolysis in anterior wall acute myocardial infarction, 904
- Usefulness of aspirin for coronary artery disease, 637
- Atenolol**
- Comparison of bevantolol and atenolol in chronic stable angina, 1204

- Comparison of the antihypertensive effects of betaxolol to atenolol, 807
- Atherosclerosis**  
See also Coronary artery disease  
Atherogenic effects of beta blockers on cells cultured from normal and atherosclerotic aorta, 1116  
Atherosclerotic aneurysms of aortocoronary vein grafts, 185  
Electrocardiographic manifestations and in-hospital prognosis of transient acute myocardial ischemia at rest, 31
- Atrial fibrillation**  
Bigeminy during atrial fibrillation, 1154  
Prevalence and significance of atrial fibrillation in coronary artery disease (CASS registry), 714  
Propafenone for paroxysmal atrial fibrillation, 473  
Propafenone for prevention of recurrent atrial fibrillation, 914
- Atrial flutter**  
Endocardial catheter fulguration for treatment of atrial flutter, 471  
Facilitating influence of disopyramide on atrial flutter termination of overdrive pacing, 1046  
Validation of double-spike electrograms as markers of conduction delay or block in atrial flutter, 775
- Atrial natriuretic factor**  
Effects of repeated increments in right atrial pressure on secretion of atrial natriuretic factor, 932
- Atrial natriuretic peptide**  
Atrial natriuretic peptide during supraventricular tachycardia and relation to hemodynamic changes and renal function, 1260  
Atrial natriuretic peptide in acute Coxsackievirus murine myocarditis, 1361
- Atrial pacing**  
Acute termination of supraventricular tachyarrhythmias in children by transeptal catheter atrial pacing, 925  
Correlation of minimum coronary lumen diameter with left ventricular functional impairment induced by atrial pacing, 697  
Termination of sustained ventricular tachycardia by transeptal catheter atrial pacing, 463
- Atrial pressure**  
Effects of repeated increments in right atrial pressure on secretion of atrial natriuretic factor, 932
- Atrial tachycardia**  
Atrial automatic tachycardia in children, 1127
- Atrioventricular junction**  
Sudden death in hemochromatosis after closed-chest catheter ablation of the atrioventricular junction, 941
- Atropine**  
Effects of phentolamine and atropine on angina pectoris induced by handgrip test in patients with variant angina, 71
- Autonomic nervous system**  
Assessment by autonomic blockade of age-related changes of the sinus node function and autonomic regulation in sick sinus syndrome, 361  
Components of heart rate variability measured during healing of acute myocardial infarction, 208
- Autonomic regulation**  
Assessment of autonomic regulation in chronic congestive heart failure by heart rate spectral analysis, 1292
- Autonomic tone**  
Intrinsic left ventricular contractility in normal subjects, 621
- Balloon angioplasty**  
Early results of balloon angioplasty of native aortic coarctation in young adults, 930  
Results of percutaneous transluminal coronary angioplasty for angina pectoris early after acute myocardial infarction, 1236
- Balloon pumping**  
Intraaortic balloon pumping for prolonged circulatory support, 554  
Risks associated with intraaortic balloon pumping in patients with and without diabetes mellitus, 558
- Balloon valvotomy**  
Percutaneous double balloon valvotomy for rheumatic tricuspid stenosis, 660
- Balloon valvuloplasty**  
See also Valvuloplasty  
Noninvasive assessment of mitral stenosis before and after percutaneous balloon mitral valvuloplasty, 817  
Physiopathology of transient ventricular occlusion during balloon valvuloplasty for pulmonic or aortic stenosis, 436
- Basement membrane**  
Basement membrane thickening in cardiac myocytes and capillaries in chronic Chagas' disease, 1137
- Bendroflumethiazide**  
Age and antihypertensive drugs (hydrochlorothiazide, bendroflumethiazide, nadolol and captopril), 117
- Bepidril**  
Long-term bepidril monotherapy for angina pectoris, 1210
- Beta-adrenergic blockade**  
Atherogenic effects of beta blockers on cells cultured from normal and atherosclerotic aorta, 1116  
Impaired beta-adrenergic receptor and normal postreceptor responsiveness in congestive heart failure, 1132
- Beta-adrenergic stimulation**  
Effects of beta-adrenergic stimulation on atrial latency and atrial vulnerability in patients with paroxysmal supraventricular tachycardia, 1031
- Betaxolol**  
Comparison of the antihypertensive effects of betaxolol to atenolol, 807
- Bevantolol**  
Comparison of bevantolol and atenolol in chronic stable angina, 1204
- Bioprostheses**  
Bioprostheses in tricuspid and mitral valve positions for 100 months with heavier calcific deposits on the left-sided valve followed by new bioprostheses in both positions for 95 months with heavier calcific deposits on the right-sided valve, 947  
Comparative study of primary tissue failure between porcine (Hancock and Carpentier-Edwards) and bovine pericardial (Ionescu-Shiley) bioprostheses in the aortic position at five- to nine-year follow-up, 812
- Blelock-Taussig anastomosis**  
Rupture of an aneurysmal pulmonary trunk 40 years after Blelock-Taussig anastomosis, 477
- Blood flow**  
Assessment of mitral flow velocity with exercise by an index of stress-induced left ventricular ischemia in coronary artery disease, 536  
Changes in coronary blood flow and myocardial metabolism during aortic balloon valvuloplasty, 1080  
Coronary blood flow velocity during percutaneous transluminal coronary angioplasty as a guide for assessment of the functional result, 253  
Influence of sublingual nitroglycerin on diastolic transmitral flow velocities in normal subjects, 481  
Limits of reproducibility of mitral pulsed Doppler spectra, 891  
Serial evaluation of left ventricular function in congestive heart failure by measurement of peak aortic blood acceleration, 367
- Blood pressure**  
See also Hypertension; Systemic hypertension  
Arterial distensibility and ambulatory blood pressure monitoring in essential hypertension, 1066  
Comparison of blood pressure response to exogenous epinephrine in hypertensive men and women, 1288  
Correlates of systolic and diastolic blood pressure in men 40 to 59 years of age sampled from: United States of America and Union of Soviet Socialist Republics Lipid Research Clinics Populations, 1071  
Does effective diastolic coronary venous retroperfusion depend on arterial-like blood pressure in the coronary sinus? 1148  
Effect of behavior state on caffeine's ability to alter blood pressure, 798  
Factors of importance for prognosis in men with angina pectoris derived from a random population sample. The Multifactor Primary Prevention Trial, Gothenburg, Sweden, 530
- Body weight**  
Clinical features of mitral valve prolapse associated with low body weight, 662
- Bundle branch block**  
Clinical significance of exercise-induced bundle branch block, 346  
Effect of conduction defects on the signal-averaged electrocardiographic determination of late potentials, 1265  
Electrocardiographic criteria for ventricular tachycardia in wide complex left bundle branch block morphology tachycardias, 1279
- Caffeine**  
Effect of behavior state on caffeine's ability to alter blood pressure, 798
- Calcium antagonists**  
Acute effects of felodipine in exertional angina pectoris, 691  
Acute hemodynamic effects of intravenous isradipine, 1102  
Relation between serum nifedipine concentration and hemodynamic effects in nonobstructive hypertrophic cardiomyopathy, 830
- Captopril**  
Age and antihypertensive drugs (hydrochlorothiazide, bendroflumethiazide, nadolol and captopril), 117
- Cardiac anatomy**  
Comparison of magnetic resonance imaging with echocardiography and

- radionuclide angiography in assessing cardiac function and anatomy following Mustard's operation for transposition of the great arteries, 1316
- Cardiac anomalies**  
Complex of discrete subaortic stenosis, single coronary artery arising from a small left aortic sinus, a rudimentary low-seated left aortic cusp and a congenital aortic regurgitation, 479
- Cardiac arrest**  
Comparison of outcome of resuscitation of out-of-hospital cardiac arrest in persons younger and older than 70 years of age, 1120  
Fatal and nonfatal cardiac arrest in patients with an implanted antitachycardia device for the treatment of supraventricular tachycardia, 919  
Prognostic significance of arrhythmia inducibility or noninducibility at initial electrophysiologic study in survivors of cardiac arrest, 578
- Cardiac Arrhythmia Pilot Study**  
Recruitment and baseline description of patients in the Cardiac Arrhythmia Pilot Study, 704
- Cardiac catheterization**  
Contrast media-related complications during cardiac catheterization using Hexabrix or Renografin in high-risk patients, 1334
- Cardiac contusion**  
Frequency of cardiac contusion in nonpenetrating chest injury, 391
- Cardiac function**  
Accuracy of electrical impedance cardiography for measuring cardiac output in children with congenital heart defects, 612  
Comparison of magnetic resonance imaging with echocardiography and radionuclide angiography in assessing cardiac function and anatomy following Mustard's operation for transposition of the great arteries, 1316
- Cardiac rehabilitation**  
Comparison of high- and low-intensity exercise training early after acute myocardial infarction, 26
- Cardiac strabulation**  
Cardiac strabulation: two-dimensional echo recognition of a rare complication of epicardial pacemaker therapy, 654
- Cardiac transplantation**  
Delayed reversal of impaired vasodilation in congestive heart failure after heart transplantation, 1076  
Diurnal variations of QT interval after cardiac transplantation, 482  
Hemodynamic profiles at rest and during supine exercise after orthotopic cardiac transplantation, 1328  
The 24-hour heart rate behavior in long-term survivors of cardiac transplantation, 880  
Timing of cardiac transplantation in idiopathic dilated cardiomyopathy, 416
- Cardiac tumors**

Effects of verapamil on left ventricular diastolic filling in children with hypertrrophic cardiomyopathy, 413

Relation between serum nifedipine concentration and hemodynamic effects in nonobstructive hypertrophic cardiomyopathy, 830

**Idiopathic dilated cardiomyopathy**

Long-term prognostic significance of ventricular arrhythmias in idiopathic dilated cardiomyopathy, 146

Timing of cardiac transplantation in idiopathic dilated cardiomyopathy, 418

**Idioventricular rates**

Idioventricular rates in early and late phases of acute myocardial infarction, 936

**Imipramine**

Effects of encainide, flecainide, imipramine and moricizine on ventricular arrhythmias during the year after acute myocardial infarction: the CAPS, 501

**Impedance cardiography**

Accuracy of electrical impedance cardiography for measuring cardiac output in children with congenital heart defects, 612

**Indecainide**

Noninvasive evaluation of indecainide for serious ventricular tachyarrhythmias, 764

**Infants**

Correlation of left ventricular angiographic casts and biplane left ventricular volumetry in infants and children, 441

**Infarct size**

Relation between infarct size and left ventricular performance assessed in patients with first acute myocardial infarction randomized to intracoronary thrombolytic therapy or to conventional treatment, 1

**Interruption of the aortic arch**

Cardiac malformations in relatives of children with truncus arteriosus or interruption of the aortic arch, 423

**Iron deficiency**

Effect of iron deficiency on tissue oxygen delivery in cyanotic congenital heart disease, 805

**Ischemia**

An ischemic index from the electrocardiogram to select patients with low left ventricular ejection fraction for coronary artery bypass grafting, 288

Antischismic effects of a newly developed capsule containing 120 mg isosorbide

dinitrate in sustained release form, 1352

Assessment of mitral flow velocity with exercise by an index of stress-induced left ventricular ischemia in coronary artery disease, 536

Asymptomatic myocardial ischemia as a predictor of cardiac events after coronary artery bypass grafting for stable angina pectoris, 248

Characteristics of silent and symptomatic myocardial ischemia during daily activities, 1223

Dynamics of early and late left ventricular filling determined by Doppler two-dimensional echocardiography during percutaneous transluminal coronary angioplasty, 541

Lack of diurnal variation in maximal symptom-limited exercise test response in chronic stable angina, 38

Recovery of severe ischemic ventricular dysfunction after coronary artery bypass grafting, 650

Stability of multilead ST-segment "fingerprints" over time after percutaneous transluminal coronary angioplasty and its usefulness in detecting reocclusion, 1232

**Isoproterenol**

Usefulness of isoproterenol in facilitating atrioventricular nodal reentry tachycardia during electrophysiologic testing, 1037

**Isosorbide dinitrate**

Antischismic effects of a newly developed capsule containing 120 mg isosorbide dinitrate in sustained release form, 1352

Effect of intravenous isosorbide dinitrate versus nitroglycerin on elevated pulmonary arterial wedge pressure during acute myocardial infarction, 21

Reduction of nitroglycerin and isosorbide dinitrate by hemodialysis in refractory angina pectoris after acute myocardial infarction, 954

**Iradipine**

Acute hemodynamic effects of intravenous iradipine, 1102

**Kawasaki disease**

Effects of current therapy of Kawasaki disease on eicosanoid metabolism, 1323

Tricuspid and mitral regurgitation detected by color flow Doppler in the acute phase of Kawasaki disease, 386

**Lactate dehydrogenase**

Usefulness of lactate dehydrogenase and lactate dehydrogenase isoenzymes for diagnosis of acute myocardial infarction, 754

**Late potentials**

Effect of conduction defects on the signal-averaged electrocardiographic determination of late potentials, 1265

Natural history of late potentials in the first ten days after acute myocardial infarction and relation to early ventricular arrhythmias, 1187

**Lead selection**

Importance of lead selection in QT interval measurement, 83

**Left atrial isomerism**

Left isomerism with left-sided systemic venous return and ventriculoarterial concordance: Six-year follow-up after a "mirror image" Mustard operation, 949

**Left axis deviation**

Left axis deviation and left anterior

fascicular block, 868

**Left ventricular function**

Comparison of five methods for the measurement of left ventricular ejection time, 492

Correlates of supranormal (ejection fraction >85%) left ventricular performance, 1145

Correlation of minimum coronary lumen diameter with left ventricular functional impairment induced by atrial pacing, 697

Determinants and protective potential of coronary arterial collaterals as assessed by an angioplasty model, 677

Dynamics of early and late left ventricular filling determined by Doppler two-dimensional echocardiography during percutaneous transluminal coronary angioplasty, 541

Effect of increasing heart rate on left ventricular performance in patients with normal cardiac function, 617

Effect of propranolol on the left ventricular response to the valsalva maneuver in normal subjects, 400

Effects of spontaneous respiration on diastolic left ventricular filling assessed by pulsed Doppler echocardiography, 1356

Importance of atrial contraction to left ventricular filling in mitral stenosis, 1135

Influence of stenosis severity on coronary collateral development and importance of collaterals in maintaining left ventricular function during acute coronary occlusion, 866

Influence on prognosis and morbidity of left ventricular ejection fraction with and without signs of left ventricular failure after acute myocardial infarction, 1165

Intrinsic left ventricular contractility in normal subjects, 621

Left ventricular dysfunction after prolonged strenuous exercise in healthy subjects, 875

Left ventricular filling determined by Doppler echocardiography in diabetics mellitus, 1140

Left ventricular performance determined by ambulatory monitoring of systolic time intervals during daily activities in the late hospital phase of acute myocardial infarction, 1347

Relation between infarct size and left ventricular performance assessed in patients with first acute myocardial infarction randomized to intracoronary thrombolytic therapy or to conventional treatment, 1

Relation of acute antiarrhythmic drug efficacy to left ventricular function in coronary artery disease, 1050

Relation of coronary arterial patency and left ventricular function to electrocardiographic changes after streptokinase treatment during acute myocardial infarction, 981

Relation of left ventricular free wall rupture in acute myocardial infarction to forced immobilization, 910

Relation of left ventricular function and Na,K-pump concentration in suspected idiopathic dilated cardiomyopathy, 1312

Serial evaluation of left ventricular function in congestive heart failure by measurement of peak aortic blood acceleration, 367

Physiopathology of transient ventricular occlusion during balloon valvuloplasty for pulmonic or aortic stenosis, 436

Provocation and amplification of the transvalvular pressure gradient in rheumatic tricuspid stenosis, 1307

#### Stenosis, recurrent

Usefulness of early radionuclide angiography for identifying low-risk patients for late restenosis after percutaneous transluminal coronary angioplasty, 51

#### Strength-interval relation

Strength-interval relation for ventricular functional refractoriness, 88

#### Streptokinase

Relation between infarct size and left ventricular performance assessed in patients with first acute myocardial infarction randomized to intracoronary thrombolytic therapy or to conventional treatment, 1

Relation of coronary arterial patency and left ventricular function to electrocardiographic changes after streptokinase treatment during acute myocardial infarction, 961

#### ST segment

Stability of multilead ST-segment "fingerprints" over time after percutaneous transluminal coronary angioplasty and its usefulness in detecting reocclusion, 1232

#### ST-T complex

Optimal lead subsets for reconstruction of QRS and ST-T in 35-lead precordial maps, 885

#### Supraventricular tachycardia

Comparative quantitative electrophysiologic effects of adenosine triphosphate on the sinus node and atrioventricular node, 330

Effects of beta-adrenergic stimulation on atrial latency and atrial vulnerability in patients with paroxysmal supraventricular tachycardia, 1031

Fatal and nonfatal cardiac arrest in patients with an implanted antitachycardia device for the treatment of supraventricular tachycardia, 919

Usefulness of adenosine for arrhythmias in infants and children, 336

Usefulness of isoproterenol in facilitating atrioventricular nodal reentry

tachycardia during electrophysiologic testing, 1037

#### Surgery

See also Coronary artery bypass grafting

An echocardiographic study of the association of ventricular septal defect and right ventricular muscle bundles with a fixed subaortic abnormality, 857

Comparison of effects of medical and surgical therapy on survival in severe angina pectoris and two-vessel coronary artery disease with and without left ventricular dysfunction: A Coronary Artery Surgery Study; registry study, 1198

Percutaneous transluminal coronary angioplasty in patients with two or more previous coronary artery bypass grafting operations, 1243

Prevalence and significance of gallium-67 uptake in the heart after open-heart surgery, 405

Results of percutaneous transluminal coronary angioplasty by multiple, relatively low frequency operators: 1986-1987 experience, 1229

Results of the modified Fontan operation in adults, 602

Surgical removal of the intracoronary portion of a fractured angioplasty guidewire, 946

Surgical risk factors in total anomalous pulmonary venous connection, 606

#### Symposium: Advances in Clinical Practice of Nitrate Therapy

Acute and chronic efficacy of 10 mg of nitroglycerin patch in stable angina pectoris, 52E

Acute and sustained antianginal effects of nitroglycerin patches: Objective evaluation with training-effect-eliminated exercise performance index, 39E

Acute effect of various doses of isosorbide-5-mononitrate on hemodynamic and exercise performance in coronary artery disease, 31E

Age-related hemodynamic effects of intravenous nitroglycerin for acute myocardial infarction and left ventricular failure, 81E

Comparative evaluation of isosorbide-5-mononitrate and nitroglycerin in chronic congestive heart failure, 19E

Dose-ranging study of isosorbide-5-mononitrate in chronic congestive heart failure treated with diuretics and angiotensin-converting enzyme inhibitor, 28E

Effects of isosorbide dinitrates intravenously in high doses over a short period in anterior acute myocardial infarction, 78E

Effects of long-term treatment with 120 mg of sustained-release isosorbide dinitrate and 60 mg of sustained-release nifedipine on myocardial perfusion, 74E

Efficacy of a new transdermal nitroglycerin patch (Deponit 10) for stable angina pectoris, 44E

Emergency treatment of severe cardiogenic pulmonary edema with intravenous isosorbide-5-mononitrate, 22E

Increased exercise tolerance and reduced duration of ischemia after isosorbide dinitrate oral spray in angina pectoris, 4E

Intravenous isosorbide dinitrate during

open-heart surgery and its role in the treatment of right-sided congestive heart failure, 70E

#### Introduction, 1E

More rapid relief of pain with isosorbide dinitrate oral spray than with sublingual tablets in elderly patients with angina pectoris, 2E

Nitrates and calcium antagonists for silent myocardial ischemia, 15E

Nitroglycerin oral spray: evaluation of its coronary artery dilative action by quantitative angiography, 7E

Relation of transdermal nitroglycerin efficacy with dosage in different subsets of patients, 59E

Sustained-release isosorbide mononitrate (50 mg): Optimization of a once-daily dosage form for long-term treatment of angina pectoris, 12E

Transdermal nitroglycerin patches for silent myocardial ischemia during antianginal treatment, 36E

#### Symposium: Arrhythmia

##### Therapy—Controversies, Directions and Challenges

Antiarrhythmic therapy for asymptomatic ventricular arrhythmias, 102A

Combination therapy for cardiac arrhythmias, 95A

Electrical devices for treatment of arrhythmias, 45A

General discussion I, 58A

General discussion II, 108A

Generation of arrhythmias in myocardial ischemia and infarction, 20A

Introduction, 1A

Mechanisms for arrhythmias, 2A

Mechanisms of clinical tachycardias, 9A

Overview of the clinical pharmacology of antiarrhythmic drugs, 61A

Proarrhythmic events, 70A

Reflections on arrhythmia therapy, 112A

Surgical treatment of arrhythmias, 27A

#### Symposium: Behavioral Disorders in Heart Disease (December 1987 Issue)

An animal model to examine the response to environmental stress as a factor in sudden cardiac death, 9J

Association between silent myocardial ischemia and prognosis: insensitivity of angina pectoris as a marker of coronary artery disease activity, 33J

Cardiac symptoms and anxiety disorders: contributing factors and pharmacologic treatment, 68J

Cardiovascular reactivity as behavior, 3J

Influence of the normal personality dimension of neuroticism on chest pain symptoms and coronary artery disease, 20J

Introduction, 1J

Mitral valve prolapse: from syndrome to disease, 53J

Multiple risk factors for coronary artery disease: behavioral factors in preventive cardiology, 74J

Neurogenic heart disease: a unifying hypothesis, 15J

Psychiatric management of acute myocardial infarction in the coronary care unit, 58J

Refining the type A hypothesis: emergence of the hostility complex, 27J

Treadmill exercise test and ambulatory measures in panic attacks, 48J

Unrecognized prevalence of panic disorder in primary care, internal medicine and cardiology, 38J

#### Symposium: Hypertension Into the Nineties

Acute hemodynamic effects of celiprolol,

- 49C  
 Antihypertensive therapy with celiprolol: a new cardioselective beta blocker, 14C  
 Atenolol and celiprolol for stable angina pectoris, 52C  
 Celiprolol and the heart, 34C  
 Celiprolol—review of airways studies, 23C  
 Concluding remarks, 59C  
 Current and future strategies in the treatment of hypertension, 2C  
 Effects of celiprolol on serum lipids in systemic hypertension, 41C  
 Effects of celiprolol on the bronchial reactivity in asthma, 53C  
 Evaluation of the antihypertensive effect of celiprolol by ambulatory blood pressure monitoring, 27C  
 General discussion, 57C  
 Introduction, 1C  
 Qualities of an ideal beta-adrenoceptor antagonist and comparison of existing agents with a new cardioselective hydrophilic vasodilator beta-adrenoceptor antagonist, celiprolol, 8C  
 Reduction of left ventricular hypertrophy in hypertensive patients after treatment with celiprolol, 55C  
 Systemic and renal hemodynamic effects of celiprolol in essential hypertensives, 45C
- Symposium: Hypertension—The Heart and Kidney (December 1987 Issue)**  
 Acute and chronic studies of diltiazem in elderly versus young hypertensive patients, 118I  
 An epilogue: target-organ involvement in essential hypertension based on presented concepts and discussions, 127I  
 Autocrine-paracrine mechanisms of vascular myocytes in systemic hypertension, 99I  
 Cellular mechanisms of growth in cardiovascular tissue, 104I  
 Changes in vascular endothelium and its function in systemic arterial hypertension, 110I  
 Demographic considerations in the selection of antihypertensive therapy, 121I  
 Development and progression of chronic renal disease: can it be prevented or attenuated? 53I  
 Does essential hypertension lead to renal failure? 42I  
 Efficacy and safety of sustained-release diltiazem as replacement therapy for beta blockers and diuretics for stable angina pectoris and coexisting essential hypertension: a multicenter trial, 29I  
 Efficacy, electrocardiographic and renal effects of intravenous diltiazem for essential hypertension, 78I  
 Introduction, 1I

Color and pulsed-wave Doppler study of aortic regurgitation in systemic hypertension, 928  
Sudden death and cardiomegaly unassociated with coronary, valvular, congenital or specific myocardial disease, 659  
The pulmonary circulation in essential systemic hypertension, 1061

#### Systole

Correlates of systolic and diastolic blood pressure in men 40 to 59 years of age sampled from United States of America and Union of Soviet Socialist Republics Lipid Research Clinics Populations, 1071

#### Systolic blood pressure

Noninvasive measurement of right ventricular systolic pressure by combined color-coded and continuous-wave Doppler ultrasound, 668

#### Tachyarrhythmia

Acute termination of supraventricular tachyarrhythmias in children by transesophageal atrial pacing, 925

#### Tachycardia

Analysis of antiarrhythmic drug concentrations determined during electrophysiologic drug testing in patients with inducible tachycardias, 922  
Atrial natriuretic peptide during supraventricular tachycardia and relation to hemodynamic changes and renal function, 1260  
Developments, complications and limitations of catheter-mediated electrical ablation of posterior accessory atrioventricular pathways, 309  
Electrocardiographic criteria for ventricular tachycardia in wide complex left bundle branch block morphology tachycardias, 1279  
Linking by collision initiated in the absence of preexisting reentrant tachycardia, 354  
Pacemaker-mediated endless loop tachycardia at rates below the upper rate limit, 465

Transient entrainment of pacemaker circus movement tachycardia, 943

#### Technetium-99m

Usefulness of early positive technetium-99m stannous pyrophosphate scan in predicting reperfusion after thrombolytic therapy for acute myocardial infarction, 18

#### Technetium-99m/thallium-201

Significance of technetium-99m/thallium-201 overlap on simultaneous dual emission computed tomography in acute myocardial infarction, 1181

#### Tensor apparatus

Double-orifice mitral valve: a study of 27 postmortem cases with developmental, diagnostic and surgical considerations, 152

#### Tetralogy of Fallot

Echocardiographic evaluation of obstructive mechanism of tetralogy of Fallot with restrictive ventricular septal defect, 664  
Rupture of an aneurysmal pulmonary trunk 40 years after Blalock-Taussig anastomosis, 477

#### Thallium-201

A comparative study of thallium-201 single-photon emission computed tomography and electrocardiography in Duchenne and other types of muscular dystrophy, 636  
Effect of diltiazem on myocardial infarct size estimated by enzyme release, serial thallium-201 single-photon emission computed tomography and radionuclide angiography, 1172

#### Thromboendarterectomy

Doppler assessment of changes in right-sided cardiac hemodynamics after pulmonary thromboendarterectomy, 1092

#### Thrombolysis

Adoption of thrombolytic therapy in the management of acute myocardial infarction, 510  
Comparison of two dose regimens of intravenous tissue plasminogen activator for acute myocardial infarction, 723  
Disimilar systemic and local adverse effects of thrombolytic therapy, 1344  
Improved survival up to four years after early coronary thrombolysis, 524  
Limitations in the interpretation of rest-exercise ejection fraction changes after early thrombolytic therapy during acute myocardial infarction, 743  
Low dose aspirin after early thrombolysis in anterior wall acute myocardial infarction, 904  
Usefulness of early positive technetium-99m stannous pyrophosphate scan in predicting reperfusion after thrombolytic therapy for acute myocardial infarction, 18  
Usefulness of the accelerated idioventricular rhythm as a marker for myocardial necrosis and reperfusion during thrombolytic therapy in acute myocardial infarction, 231

#### Thrombus

Detection of thromboembolus of the right pulmonary artery by transesophageal two-dimensional echocardiography, 488  
Disimilar systemic and local adverse effects of thrombolytic therapy, 1344

#### Tissue failure

Comparative study of primary tissue failure between porcine (Hancock and Carpentier-Edwards) and bovine pericardial (Ionescu-Shiley)

bioprosthesis in the aortic position at five- to nine-year follow-up, 812

#### Tissue plasminogen

Comparison of two dose regimens of intravenous tissue plasminogen activator for acute myocardial infarction, 723

#### Tocainide

Tocainide plus quinidine for treatment of ventricular arrhythmias, 570

#### Tomography

A comparative study of thallium-201 single-photon emission computed tomography and electrocardiography in Duchenne and other types of muscular dystrophy, 836  
Comparison of dipyridamol-handgrip test and bicycle exercise test for thallium tomographic imaging, 264  
Effect of diltiazem on myocardial infarct size estimated by enzyme release, serial thallium-201 single-photon emission computed tomography and radionuclide angiography, 1172  
F-18 deoxyglucose and stress N-13 ammonia positron emission tomography in anterior wall healed myocardial infarction, 1191  
Significance of technetium-99m/thallium-201 overlap on simultaneous dual emission computed tomography in acute myocardial infarction, 1181  
Use of exercise thallium-201 imaging for risk stratification of elderly patients with coronary artery disease, 269

#### Transposition of the great arteries

Cardiorespiratory exercise testing after venous switch operation in children with complete transposition of the great arteries, 861  
Inducible atrial flutter after the Mustard repair of complete transposition of the great arteries, 428

#### Tricuspid regurgitation

Tricuspid and mitral regurgitation detected by color flow Doppler in the acute phase of Kawasaki disease, 386

#### Tricuspid valve

Bioprostheses in tricuspid and mitral valve positions for 100 months with heavier calcific deposits on the left-sided valve followed by new bioprostheses in both positions for 95 months with heavier calcific deposits on the right-sided valve, 947

#### Truncus arteriosus

Cardiac malformations in relatives of children with truncus arteriosus or interruption of the aortic arch, 423

#### Two-dimensional echocardiography

See also Doppler ultrasound;  
Echocardiography  
Cardiac strangulation: two-dimensional echo recognition of a rare complication of epicardial pacemaker therapy, 654

#### Urokinase

Efficacy of intravenous prourokinase and a combination of prourokinase and urokinase in acute myocardial infarction, 971

Prolonged infusion of urokinase for recanalization of chronically occluded aortocoronary bypass grafts, 189

Termination of sustained ventricular tachycardia by external noninvasive pacing, 574  
Termination of sustained ventricular tachycardia by transeptal atrial pacing, 463  
Usefulness of echocardiographic abnormal left ventricular ejection fraction, paroxysmal ventricular tachycardia and complex ventricular arrhythmias in predicting new coronary events in patients over 62 years of age, 1349  
Value of the signal-averaged electrocardiogram as a predictor of the results of programmed stimulation in nonsustained ventricular tachycardia, 1272
- Ventricular volume**  
Correlation of right ventricular volume using axial angulated ventriculography to known right ventricular cast volumes in infants and children with congenital heart disease, 161
- Ventriculography**  
Correlation of right ventricular volume using axial angulated ventriculography to known right ventricular cast volumes in infants and children with congenital heart disease, 161  
F-18 deoxyglucose and stress N-13 ammonia positron emission tomography in anterior wall healed myocardial infarction, 1191  
Frequency of cardiac contusion in nonpenetrating chest injury, 391
- Verapamil**  
Effects of verapamil on left ventricular diastolic filling in children with hypertrophic cardiomyopathy, 413  
Reversal of ST depression and low maximal oxygen uptake after verapamil with normal coronary arteries and pulmonary disease, 955
- Wolff-Parkinson-White syndrome**  
Developments, complications and limitations of catheter-mediated electrical ablation of posterior accessory atrioventricular pathways, 309
- Women**  
Coronary artery disease in women, 641
- Xanthomatosis**  
Aneurysmal coronary artery disease in cerebrotendinous xanthomatosis, 1150
